-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2837

1. The drawings are objected to because numerals 54 and 58 are not in the drawings. In addition, Fig. 2 (A) is not complete. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Claim 3 is objected to because of the following informalities: a method claim must provide method steps by reciting comprising the steps of:, and followed by active steps. Claim 3 is recited as an apparatus claim, and is treated accordingly.

Further, "the drum shell", "the lower end" lack antecedent basis.

Art Unit: 2837

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Yanagisawa (4,928,566).

Regarding claim 3, Yanagisawa discloses a method of securing a drum head in which a plurality of securement device are each provided with two metal parts (41, 65), one of which is attached to the drum shell (11) and the other to the lower end of a tensioning rod (the lower end of 41 shown in Fig. 1), and an elastomeric member (82) mounted between the parts (Fig. 1).

5. Claims 1 and 2 are allowed.

6. The claims are allowable over the prior art for at least the reason that the prior art fails to reasonably teach or suggest in claims 1 and 2 that a lug assembly having a lug body secured on the outer surface of the shell and rotatable about a horizontal axis that extends radially relative to the shell; the lug body also having a transverse opening that intersects the top opening in a mutually perpendicular relationship; a cross pin disposed within the transverse opening and movable both rotatably and longitudinally; the cross

pin having a threaded transverse opening engageable by the threaded lower end of the tensioning rod as set forth in the claimed combination.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-yung Hsieh whose telephone number is 571-272-2065. The examiner can normally be reached on 7:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin can be reached on 571-272-2107. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
